BSc Food Marketing and Business Economics	UCAS code: D670
Awarding Institution:	The University of Reading
Teaching Institution:	The University of Reading
	Faculty of Life Sciences
Relevant QAA subject benchmarking group(s):	Agriculture, Food and Forestry
	Economics, Business Management
Programme length:	3 years
Relevance and applicability:	For students entering Part 1 in 2002
Date of specification:	April 2004
Programme Director:	Dr R M Bennett
Board of Studies:	Food Marketing and Business Economics

Summary of programme aims

The programme aims to provide a degree-level education in marketing and business economics together with training in the application of these disciplines to some of the key challenges facing the UK, European and global food industry.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills that all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem solving, team working and use of information technology.

Programme content

Part 1 (three terms, 120 credits) 2002/3

,		Credits	Level	Term
Compulsory modu	les(100 credits):			
AP1EE1	Economics I	20	С	1,2
AP1EE2	Applied Economics and Business Workshops	10	С	2
AP1SB1	Business Management and Marketing I	20	С	1,2
AP1A02	Introduction to Agricultural and Food Systems	10	С	1
AP1EF1	The UK Food Chain	10	С	1
AP1EQ1	Market and Data Analysis	20	С	1,2
AP1EX1	Applied Project	10	С	1

Optional modules:

Options totally 20 credits from across the University subject to timetabling constraints including:

LA1Pxx*	Institution Wide Language Programme	20	C/I/H	1,2,3
	*dependent on language and level chosen			

A list of possible options will be distributed at the beginning of Part 1.

Part 2 (three terms, 120 credits) 2003/4

* AP2EE3 must be included as a Part 3 option if not studied as an option in Part 2

Examination and Progression Rules

Part 1 Examination

The Part 1 Examination is used to assess a student's suitability to proceed to Part 2 of the programme. It also determines eligibility for the Certificate of Higher Education. The Part 1 Examination does not contribute to the classification of your degree.

In order to progress from Part 1 to Part 2 of the programme, you are required to:

- (a) achieve an overall average of 40% in 120 credits taken in Part 1; and
- (b) achieve not less than 30% in every module taken in Part 1, except that marks of less than 30% in a total of 20 credits may be condoned provided that the candidate has pursued the course for the module with reasonable diligence and has not been absent from the examination without reasonable cause, and
- (c) achieve not less than 40% in both AP1EE1 Economics I and AP1EB1Business Management and Marketing I.

If you fulfil the requirements for (a) and (b) and do not proceed to achieve a higher award, you are eligible to receive the award of Certificate of Higher Education.

Part 2 Examination

The Part 2 Examination is used to assess a student's suitability to proceed to Part 3 of their programme. It also determines eligibility for the Diploma of Higher Education. In addition, the marks achieved in the Part 2 Examination contribute to the classification of your degree.

In order to progress from Part 2 to Part 3 of the programme, you are required to:

- (a) achieve an overall average of 40% in 120 credits taken in Part 2 (of which not less than 100 credits should normally be at Intermediate level or above);
- (b) achieve not less than 30% in every module taken in Part 2, except that marks of less than 30% in a total of 20 credits may be condoned provided that the candidate has pursued the course for the module with reasonable diligence and has not been absent from the examination without reasonable cause; and
- (c) achieve not less than 40% in each of the following modules: AP2EE1Economics II, AP2SB1 Business Management and AP2EM1 Marketing Management

If you fulfil the requirements for (a) and (b) and do not proceed to achieve a higher award, you are eligible to receive the award of Diploma of Higher Education.

Part 3 Examinations

The classification of the degree will normally be based on the marks for Part 2 and Part 3 modules, weighted in a ratio of 1:2. Full details of classification conventions (that is, the rules for determining your final degree award) can be found in your Programme Handbook.

Summary of teaching and assessment

Teaching is organised in modules that typically involve a combination of lectures and seminars. During Part 1 some lecture-based modules are supported by workshops or computer lab sessions or visits to businesses in the agri-food sector. The individual and group project modules include skills workshops and progress meetings with the project supervisor. Modules are assessed by a combination of course work and formal examination; some, like the project modules, are wholly course work assessed. Course work assignments include essays, problem solving exercises, short project reports, and presentations.

Admission requirements

Entrants to this programme are normally required to have obtained:

➢ Grade C or better in Mathematics at GCSE level or equivalent;

➤ a UCAS Tariff of 240 points overall, including at least two full A-levels but excluding General Studies; or a good pass in an Access Course; or International Baccalaureate (28points). Key skills attainment may also be taken into account in deciding whether to make an offer. Admissions Tutor: Dr R M Bennett (Agricultural and Food Economics)

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

All students are issued with a comprehensive 'Programme Handbook' at the beginning of the degree which includes a detailed outline of the programme, its constituent modules and assessment guidelines. Day to day queries regarding academic matters (e.g. timetabling) should be addressed in the first instance to the Undergraduate Student Office in the School of Agriculture, Policy and Development or, where necessary, the Programme Director.

Career prospects

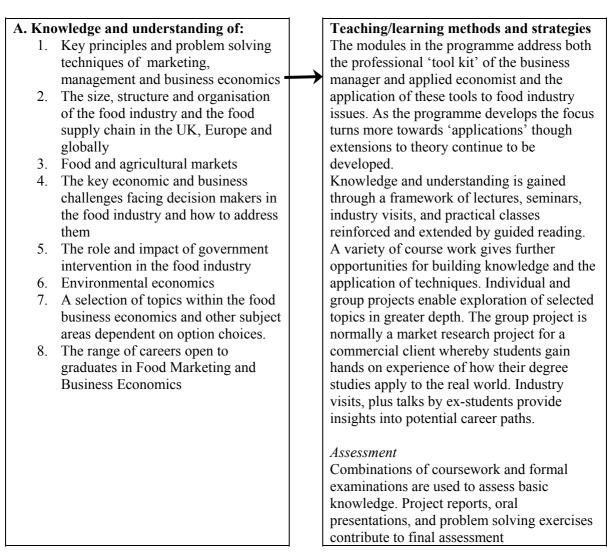

Graduates from this degree will be well equipped to enter a career in the food industry particularly in marketing and other commercial functions for a range of companies from small family businesses to multinational corporations. A number of our graduates have started their careers in food retail management. Equally the wide skills base of the degree enables graduates to go on to work in a wide range of other sectors of industry, in professions such as accountancy, with market research companies, and trade associations.

Opportunities for study abroad

The Department of Agricultural and Food Economics participates in a Socrates exchange programme under which students can spend a term during Part 2 at one of our partner Universities in France, Germany, the Netherlands, and Italy. The Department also has an exchange programme with Missouri in the United States.

Educational aims of the programme

The programme aims to provide a degree-level education in marketing and business economics together with training in the application of these disciplines to some of the key challenges facing the UK, European and global food industry.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in module and programme handbooks.
