Building and Surveying; Town and

Country Planning (overall 4 year programme)

Programme length: 3 years

Faculty of Economic and Social Sciences

Date of specification: January 2005

Programme Director: Alan Rowley

Board of Studies: Real Estate and Planning

Accreditation: Royal Institution of Chartered Surveyors;

Royal Town Planning Institute (four year programme)

Summary of programme aims

The BSc Land Management with a Diploma or MSc in Urban Planning and Development is a four year, full-time programme leading to the award of a BSc in Land Management after three years of study, and a Diploma or MSc in Urban Planning and Development after an additional nine or twelve months of study respectively. This '3+1' programme is best seen as a prescribed pathway through the BSc in Land Management (including the Planning and Development package in Part 3) followed by the Diploma or MSc programme. Only students completing this designated pathway through the BSc programme and awarded the BSc with Honours are eligible to register for the Diploma/MSc programme. This specification relates to the BSc part of the '3+1' programme.

The BSc programme is a blend of academic rigour and applied practical analysis. For students on the '3+1' programme, the BSc in Land Management programme is part of a concentrated and integrated education programme which seeks to combine the environmental, social and political awareness of planners with the market sense and commercial awareness of land managers.

The BSc programme aims to provide students with the knowledge and skills necessary for successful careers as chartered surveyors or related professionals and to engage confidently with market and development processes; to emphasise the value of inter-disciplinary working; to provide students with a structured but flexible learning framework; and to ensure that the skill areas covered by the programme are applicable to a range of occupational and professional needs.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team working and use of information technology.

The Land Management programme is designed to ensure that students progressively develop these transferable skills throughout their studies, in parallel, and integrated, with acquiring more specialist knowledge, understanding and skills.

Programme content

The BSc degree programme is divided into three parts. Part 1 covers the fundamental principles of the relevant core subjects including economics, law, planning, investment appraisal, management and finance, and building. Part 2 builds on these modules with greater emphasis on their application to the property industry. By the end of the Part 2 students not registered for the '3+1' programme have covered the required core material which can then be developed and expanded depending on the student's area of interest: these students have considerable flexibility and choice in Part 3. However, students on the '3+1' programme are required to complete additional core modules in Part 3 of the BSc programme leaving more limited flexibility and choice.

The Degree is divided into three parts. Part 1 of the programme covers the fundamental principles of the relevant core subjects including economics, law, planning, investment appraisal, management and finance, and building. Part 2 builds on these modules with greater emphasis on their application to the property industry. By the end of Part 2 all students have covered the required core material which is developed and expanded through a package of compulsory modules at Part 3 focussing on planning and development and totalling 100 credits. In Part 3 of the programme, students have some flexibility and choice: at present over thirty-five optional modules are available. Students must choose additional modules to make 120 credits at Part 3.

The programme is taught in parallel with the BSc in Land Management and students on the four year '3+1' programme may choose to transfer to the more flexible three year BSc Land Management programme at various stages during their studies.

Part 1 (three terms)		<i>Credits</i>	<i>Level</i>
<i>Compulsory modules</i>			
RE1DLM	<i>Doing Land Management</i>	20	C
EC104	<i>Economics for Managers</i>	20	C
LW1A05	<i>General Introduction to Law</i>	10	C

RE3PIA	<i>Property Investment Appraisal</i>	10	H
RE3PMP	<i>Property Management in Practice</i>	10	H
RE3PMR	<i>Property Market Research & Analysis</i>	10	H
RE3RPL	<i>Rural Policy & Land Use</i>	20	H
RE3URR	<i>Urban & Regional Regeneration</i>	10	H

Progression requirements

To proceed from Part 1 to Part 2 of the BSc Land Management degree a student must:

- achieve an overall weighted average of at least 40% across all Part 1 modules totalling 120 credits;
- obtain a mark of at least 40% in modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 1 modules will not be condoned.

To proceed from Part 2 to Part 3 of the BSc Land Management degree a student must:

- achieve an overall weighted average of at least 40% across all Part 2 modules totalling 120 credits;
- obtain a mark of at least 40% in modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 2 modules will not be condoned.

Summary of teaching and assessment

Teaching is organised in modules that, at both Parts 1 and 2, typically involved lectures and tutorials of up to fifteen students. These tutorial classes encourage students to examine the material covered in the lectures and discuss and debate relevant issues. Parts 1 and 2 comprise foundation studies, preparing students for specialist studies at Part 3, and modules are assessed by a mixture of coursework and formal examination. As the programme becomes more specialised, the nature of the teaching also changes. In Part 3, site visits, case studies, guest lectures and project work all play an important part in the learning process.

A wide variety of assessment methods is used throughout the programme, including unseen written examinations, essays and projects, and videos of group presentations.

Part 2 contributes 33% of the overall assessment of the degree and Part 3 comprises 67%.

To be eligible for the award of an Honours degree, a student must:

- achieve an overall weighted average of 40% across all modules in Part 3;
- obtain a mark of at least 40% in Part 3 modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in Part 3 modules totalling not more than 20 credits.

To be eligible for the award of a Pass degree, a student must:

- achieve an overall weighted average of 40% across all modules in Part 3;
- obtain a mark of at least 40% in Part 3 modules totalling at least 80 credits; and
- achieve a mark of not less than 35% in Part 3 modules totalling not more than 40 credits.

Progression from BSc Land Management to Diploma or MSc Urban Planning and Development

Students on the '3+1' programme must pass all the compulsory Part 3 modules and be awarded the BSc Land Management with Honours to be eligible to register for the Diploma or MSc in Urban Planning and Development programme.

Admission requirements

Entrants to this programme are normally required to have obtained:

Grade C or better in English in GCSE; and achieved

UCAS Tariff: 280 points from 3 A-Levels *or* 310 points from 3 A-Levels plus one AS level. Subjects and levels: There are no required subjects although Economics, Geography, Business Studies or Mathematics are all relevant.

International Baccalaureate: 31 points

Irish Leaving Certificate: BBBB

Admissions Tutor: Roger Gibbard

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

The Department's Resource Centre contains a variety of information sources relevant to Land Management-related courses. It has a wide-ranging reference collection of textbooks, journals, property company reports and planning documents, which complements the material held in the Main University Library. The Resource Centre also holds the *Barbour Index* microfiche files for *Planning* and *Property Management*, and a link to the on-line *FOCUS* databases provided by Property Intelligence plc. The Department has significant computer facilities for the sole use of its staff and students.

Career prospects

Our students have been regularly employed by the largest and most prestigious firms of surveyors including: Jones Lang LaSalle, DTZ Debenham Thorpe, Weatheralls, Chestertons, Cushman & Wakefield Healey & Baker, Drivers Jonas, King Sturge, Knight Frank, FPD Savills, Insignia Richard Ellis and CB Hillier Parker.

Additionally graduates have found employment with development companies (Slough Estates, Taylor Woodrow, Laing Property, Trafalgar House), management consultants (PricewaterhouseCoopers), insurance companies (Legal & General Investment Management), voluntary sector organisations (Gloucester Rural Community Council) and the private sector (Wolverhampton & Dudley Breweries plc). Traditionally our students have had little difficulty in securing employment and, even during the recession, the vast majority of our graduates had either secured jobs or been accepted for further study within three months of the end of their programme.

Opportunities for study abroad

Due to the need to meet the requirements of professional accreditation, students cannot study abroad, as part of their degree. Students may be permitted to undertake a Socrates or other study visit as part of an approved 'gap' year between Part 2 and Part 3 of the programme. Alternatively, students might choose to take a gap year after completing the BSc programme and before commencing the fourth year Diploma or MSc programmes.

Educational aims of the programme

The BSc programme is a blend of academic rigour and applied practical analysis. The programme aims to provide students with the knowledge and skills necessary for successful careers as Chartered Surveyors, Town Planners or related professionals and to engage confidently with market, development and planning processes; to emphasise the value of inter-disciplinary working; to provide students with a structured but flexible learning framework; and to ensure that the skill areas covered by the programme are applicable to a range of occupational and professional needs.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge, understanding, skills, qualities and other attributes in the following areas:

Knowledge and Understanding

<p>A. Knowledge and understanding of:</p> <ol style="list-style-type: none">1. The attributes and dimensions of property – physical, financial, functional and legal2. The nature, role and structure of the property industry and the key players – planning, development, law, property markets, occupiers, investors and services3. The environment and the economy – public policy, environmental policy, economic trends and policy, technological change and social change4. The concepts and principles of construction, economics, finance, valuation, investment, management, law and planning and their application to property and related assets5. The specialist study of planning and development	<p>Teaching/learning methods and strategies Acquisition of knowledge of fields 1 – 3 is promoted across the programme through lectures, tutorials, seminars, practicals, workshops, case studies, role-play exercises, IT-based exercises, site visits, guest lectures, other project-based assignments, and through individual consultation with academic staff and personal tutors. Part 1 of the programme focuses on developing students' understanding of the general principles the subject areas in field 4 and Part 2 concentrates on the application of these subject areas to property and land. Part 3, enables students to deepen their understanding of planning and land management with greater opportunities for self-directed learning through problem-solving and the examination of real world property problems.</p> <p><i>Assessment</i> Assessment in Part 1 is based on elements of coursework, class tests and unseen formal examinations. Modules at Part 2 are assessed in a similar way. At Part 3 a wide range of assessment methods are used including essays, unseen examination papers, open book examinations, group and design-based projects, specialist exercises (IT-based, finance and/or marketing-oriented), presentations, tutorial & seminar papers, and reports.</p>
--	---

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none">1. Integrate theory and practice2. Collect and synthesise information / data from a variety of sources3. Analyse and interpret4. Think logically and critically5. Define, solve and/or advise on problems6. Select and apply appropriate techniques of analysis, appraisal and valuation7. Plan, execute and write a report in response to a specific 'client' brief8. Adapt and apply knowledge and skills in a changing professional environment and to other fields	<p>Teaching/learning methods and strategies These skills are developed through lectures, tutorials, seminars, practicals, workshops, case studies, role-play exercises, IT-based exercises, site visits, guest lectures, other project-based assignments, and through individual consultation with academic staff and personal tutors. The programme is designed to progressively develop students' intellectual skills.</p> <p><i>Assessment</i> Intellectual skills are assessed through a wide variety of approaches including essays, unseen examination papers, open book examinations, group projects, specialist exercises (IT-based, design-based, marketing-oriented), presentations, tutorial & seminar papers, and reports</p>
---	--

C. Practical skills – able to:

1. Locate information sources and select, assemble and present information in a variety of contexts
2. Collect, record, analyse and present statistical material
3. Value a range of property and property-related assets using a variety of appraisal approaches and techniques, including the application of financial mathematics
4. Use forecasting techniques
5. Read and interpret standard company accounts
6. Write a 'plain-English' report
7. Read and interpret plans and other drawings
8. Write an effective CV

Teaching/learning methods and strategies

In Part 1, the aim of the *Doing Land Management* module is to develop, in stages, a range of fundamental skills to help students make the transition from school, to university and on to work: these include skills 1, 2, and preparatory work on 8. This module is supported by a mixture of short lecture series and tutorials, workshops and/or practicals. Similarly, modules including *Investment Appraisal* (Part 1), *Applied Valuation* (Part 2), and other package-specific modules in Part 3, address skill 3. In Part 2, *Property and Planning Studies* applies and extends into more specialised contexts the skills developed in *Doing Land Management* at Part 1 and in other modules. *Financial & Strategic Management* (Part 2) addresses skills 4 and 5 through lectures, tutorials and seminars. Many modules, for example, *Doing Land Management* (Part 1) and both *Planning Implementation* and *Financial & Strategic Management* (Part 2) guide students to write in plain-English – skill 6. In Part 3, projects and other coursework emphasise skills 1-7. All students complete a short CAS/CMS course on *Effective (job) Applications* – skill 7

Assessment

Skills 1 – 8 are primarily assessed through coursework, in the form of essays and/or practical projects. Skills 3 and 5 are also assessed through unseen written examinations

D. Transferable skills

1. Communicate effectively by oral written and graphic means
2. Numerical skills including data collection and interpretation
3. Problem solving skills
4. Time / task management and team working skills
5. Competent use of information technology including some specialist software packages
6. Business awareness
7. Information handling
8. Autonomous learning – be able to undertake self-directed study
9. Career management skills

Teaching/learning methods and strategies

The teaching and acquisition of these transferable skills is firmly embedded in the programme. For example, both written and oral communication is stressed in most modules and is a feature of all. *Doing Land Management* (Part 1), *Property & Planning Studies* (part 2) and package-specific *Project* modules in Part 3 particularly stress the acquisition and personal development of a wide range of transferable skills. A business and career-oriented culture permeates the programme fed by, *inter alia*, module content and the intended learning outcomes, staff (and student) links with practice, lectures by visiting practitioners, site visits, the analysis of market activity and events, and near-market projects, notably in Part 3. The programme's strategy on career management incorporates the use of the University Careers Advisory Service's *Effective (job) Applications* package incorporating a taught session, on-line learning material and assignments, timetabled to prepare students for the usual cycle of career presentations, applications and interviews.

Assessment

As a result of this 'pervasive' approach to transferable skills, students' performance is assessed across the full range of skills throughout the programme on a module-by-module basis through coursework including practical projects when feedback is provided. Skills 1, 6 and 8 are also assessed in Part 3 through examinations.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in module and programme handbooks.
