BSc Land Management For students entering Part 1 in 2003

UCAS code: N231

Awarding Institution: Teaching Institution: Relevant QAA subject benchmarking group(s): Faculty of Economic and Social Sciences Date of specification: January 2005 Programme Director: Alan Rowley Board of Studies: Real Estate and Planning Accreditation: Royal Institution of Chartered Surveyors The University of Reading The University of Reading Building and Surveying Programme length: 3 years

Summary of programme aims

The aim of the course is to give students a broad education in the field of land management which will serve as the basis for continuing learning in their future careers. For a fuller statement of the programme aims and learning outcomes, see below.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to career management, communication (both written and oral), information handling, numeracy, problem-solving, team working and use of information technology.

The Land Management programme is designed to ensure that students progressively develop these transferable skills throughout their studies, in parallel, and integrated, with acquiring more specialist knowledge, understanding and skills.

Programme content

The Degree is divided into three parts. Part 1of the programme covers the fundamental principles of the relevant core subjects including economics, law, planning, investment appraisal, management and finance, and building. Part 2 builds on these modules with greater emphasis on their application to the property industry. By the end of Part 2 all students have covered the required core material which can then be developed and expanded depending on the student's area of interest. In Part 3, students have considerable flexibility and choice. Five specialist 'packages' of related modules are available, each totalling 100 credits. These are:

- Development and Planning
- Investment and Finance
- Planning and Development
- Rural Studies
- Urban Property Markets and Valuation

Students must choose additional modules to make 120 credits in Part 3.

Students are given guidance on the Part 3 'packages' and other modules during their Part 2 studies. Students will normally be required to choose one of these five packages but a freer choice of Part 3 modules may be permitted in exceptional circumstances subject to the approval of the Programme Director.

The following profile lists the modules which must be taken at Parts 1 and 2 of the programme (the compulsory parts), together with the modules normally available in Part 3 of the programme from which a student must make a selection. The number of credits for each module is shown after its title.

Part 1 (three ter	,	Credits	Level

RE3URR	Urban & Regional Regeneration	10	Η

Progression requirements

To proceed from Part 1 to Part 2 of the BSc Land Management degree a student must:

- achieve an overall weighted average of at least 40% across all Part 1 modules totalling 120 credits;
- obtain a mark of at least 40% in modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 1 modules will not be condoned.

To proceed from Part 2 to Part 3 of the BSc Land Management degree a student must:

- achieve an overall weighted average of at least 40% across all Part 2 modules totalling 120 credits;
- obtain a mark of at least 40% in modules totalling at least 100 credits; and

• achieve a mark of not less than 35% in modules totalling not more than 20 credits.

Marks below 35% in Part 2 modules will not be condoned.

Summary of teaching and assessment

Teaching is organised in modules that, at both Parts 1 and 2, typically involved lectures and tutorials of up to fifteen students. These tutorial classes encourage students to examine the material covered in the lectures and discuss and debate relevant issues. Parts 1 and 2 comprise foundation studies, preparing students for specialist studies at Part 3, and modules are assessed by a mixture of coursework and formal examination. As the programme becomes more specialised, the nature of the teaching also changes. In Part 3, site visits, case studies, guest lectures and project work all play an important part in the learning process.

A wide variety of assessment methods is used throughout the programme, including unseen written examinations, essays and projects, and videos of group presentations.

Part 2 contributes 33% of the overall assessment of the degree and Part 3 comprises 67%.

To be eligible for the award of an Honours degree, a student must:

- achieve an overall weighted average of 40% across all modules in Part 3;
- obtain a mark of at least 40% in Part 3 modules totalling at least 100 credits; and
- achieve a mark of not less than 35% in Part 3 modules totalling not more than 20 credits.

To be eligible for the award of a Pass degree, a student must:

- achieve an overall weighted average of 40% across all modules in Part 3;
- obtain a mark of at least 40% in Part 3 modules totalling at least 80 credits; and
- achieve a mark of not less than 35% in Part 3 modules totalling not more than 40 credits.

Admission requirements

Entrants to this programme are normally required to have obtained:

Grade C or better in English in GCSE; and achieved

UCAS Tariff: 280 points from 3 A-Levels *or* 310 points from 3 A-Levels plus one AS level. Subjects and levels: There are no required subjects although Economics, Geography, Business Studies or Mathematics are all relevant.

International Baccalaureate: 31 points Irish Leaving Certificate: BBBBB

Admissions Tutor: Roger Gibbard

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Personal Tutors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

The Department's Resource Centre contains a variety of information sources relevant to Land Management-related courses. It has a wide-ranging reference collection of textbooks, journals, property company reports and planning documents, which complements the material held in the Main University Library. The Resource Centre also holds the *Barbour Index* microfiche files for *Planning* and *Property Management*, and a link to the on-line *FOCUS* databases provided by Property Intelligence plc. The Department has significant computer facilities for the sole use of its staff and students.

Career prospects

Our students have been regularly employed by the largest and most prestigious firms of surveyors including: Jones Lang LaSalle, DTZ Debenham Thorpe, Weatheralls, Chestertons, Cushman & Wakefield Healey & Baker, Drivers Jonas, King Sturge, Knight Frank, FPDSavills, Insignia Richard Ellis and CB Hillier Parker.

Additionally graduates have found employment with development companies (Slough Estates, Taylor Woodrow, Laing Property, Trafalgar House), management consultants (PricewaterhouseCoopers), insurance companies (Legal & General Investment Management), voluntary sector organisations (Gloucester Rural Community Council) and the private sector (Wolverhampton & Dudley Breweries plc). Traditionally our students have had little difficulty in securing employment and, even during the recession, the vast majority of our graduates had either secured jobs or been accepted for further study within three months of the end of their programme.

Opportunities for study abroad

Due to the need to meet the requirements of professional accreditation, students cannot study abroad, as part of their degree. Students may be permitted to undertake a Socrates or other study visit as part of an approved 'gap' year between Part 2 and Part 3 of the programme.

Educational aims of the programme

The BSc programme is a blend of academic rigour and applied practical analysis. The programme aims to provide students with the knowledge and skills necessary for successful careers as Chartered Surveyors or related professionals and to engage confidently with market and development processes; to emphasise the value of inter-disciplinary working; to provide students with a structured but flexible learning framework; and to ensure that the skill areas covered by the programme are applicable to a range of occupational and professional needs.

Programme Outcomes

The programme provides opportunities for students to develop and demonstrate knowledge, understanding, skills, qualities and other attributes in the following areas:

А.	Knowledge and understanding of:		Teaching/learning methods and strategies
1.	The attributes and dimensions of property –		Acquisition of knowledge of fields $1 - 3$ is
	physical, financial, functional and legal		promoted across the programme through lectures,
2.	The nature, role and structure of the property-	\rightarrow	tutorials, seminars, practicals, workshops, case
	industry and the key players – planning,		studies, role-play exercises, IT-based exercises,
	development, law, property markets,		site visits, guest lectures, other project-based
	occupiers, investors and services		assignments, and through individual consultation
3.	The environment and the economy – public		with academic staff and personal tutors. Part 1 of
	policy, environmental policy, economic		the programme focuses on developing students'
	trends and policy, technological change and		understanding of the general principles the
	social change		subject areas in field 4 and Part 2 concentrates on
4.	The concepts and principles of construction,		the application of these subject areas to property
	economics, finance, valuation, investment,		and land. The choice of package (field 5) at Part
	management, law and planning and their		3, provides students with a significant element of
	application to property and related assets		choice enabling them to deepen their
5.	One of five areas of specialist study:		understanding of land management according to
	Development and Planning		their interests and, possibly, career plans. These
	Investment & Finance		packages provide greater opportunities for self-
	• Planning & Development		directed learning through problem-solving and
	Rural Studies		the examination of real world property problems.
	Urban Property Markets and Valuation		The teaching and content of the packages also
			tends to relate to staff research interests and
			activities. During Part 2 of the programme
			students are provided with a range of
			opportunities to consider and evaluate the
			available packages in Part 3, including sessions
			given by recent graduates now in practice and
			current Part 3 students.
			Assessment
			Assessment in Part 1 is based on elements of
			coursework, class tests and unseen formal
			examinations. Modules at Part 2 are assessed in a
			similar way. The balance of assessment methods
			varies somewhat at Part 3 depending on the
			choice of specialist package. The full range of
			assessment methods are used including essays,
			unseen examination papers, open book
			examinations, multiple-choice examination
			papers, group projects, specialist exercises (IT-
			based, design-based, marketing-oriented),
			presentations, tutorial & seminar papers, and
			reports.

2.

3.

4.

6.

C. Practical skills – able to: Teaching/learning methods and strategies In Part 1, the aim of the *Doing Land Management* 1. Locate information sources and select, assemble and present information in a variety module is to develop, in stages, a range of fundamental skills to help students make the Collect, record, analyse and present statistical transition from school, to university and on to work: these include skills 1, 2, and preparatory Value a range of property and propertywork on 7. This module is supported by a mixture related assets using a variety of appraisal of short lecture series and tutorials, workshops approaches and techniques, including the and/or practicals. Similarly, modules including application of financial mathematics Investment Appraisal (Part 1), Applied Valuation Use forecasting techniques (Part 2), and other package-specific modules in Part 3, address skill 3. In Part 2, Property and 5. Read and interpret standard company Planning Studies applies and extends into more Write a 'plain-English' report specialised contexts the skills developed in *Doing* 7. Write an effective CV Land Management at Part 1 and in other modules. Financial & Strategic Management (Part 2) addresses skills 4 and 5 through lectures, tutorials and seminars. Many modules, for example, Doing Land Management (Part 1) and both Planning Implementation and Financial & Strategic Management (Part 2) guide students to write in plain-English - skill 6. In Part 3, projects and other coursework emphasise skills 1-6 subject to the student's choice of specialist package. All students complete a short CAS/CMS course on Effective (job) Applications

tutorial & seminar papers, and reports

Assessment Skills 1 - 7 are primarily assessed through coursework, in the form of essays and/or practical projects. Skills 3 and 5 are also assessed through unseen written examinations

		1	
D.	Transferable skills		Teaching/learning methods and strategies
1.	Communicate effectively by oral and written		The teaching and acquisition of these transferable
	means (also graphically subject to choice of		skills is firmly embedded in the programme. For
	option modules)		example, both written and oral communication is
2.	Numerical skills including data collection and-	\rightarrow	stressed in most modules and is a feature of all.
	interpretation		Doing Land Management (Part 1), Property &
3.	Problem solving skills		Planning Studies (part 2) and package-specific
4.	Time / task management and team working		Project modules in Part 3 particularly stress the
	skills		acquisition and personal development of a wide
5.	Competent use of information technology		range of transferable skills. A business and
	including some specialist software packages		career-oriented culture permeates the programme
6.	Business awareness		fed by, <i>inter alia</i> , module content and the
7.	Information handling		intended learning outcomes, staff (and student)
8.	Autonomous learning – be able to undertake		links with practice, lectures by visiting
0.	self-directed study		practitioners, site visits, the analysis of market
9.	Career management skills		activity and events, and near-market projects,
9.	Career management skins		notably in Part 3. The programme's strategy on
			career management incorporates the use of the
			University Careers Advisory Service's <i>Effective</i>
			<i>(job) Applications</i> package incorporating a taught
			session, on-line learning material and
			assignments, timetabled to prepare students for
			the usual cycle of career presentations,
			applications and interviews.
			Assessment
			As a result of this 'pervasive' approach to
			transferable skills, students' performance is
			assessed across the full range of skills throughout
			the programme on a module-by-module basis
			through coursework including practical projects
			when feedback is provided. Skills 1, 6 and 8 are
			also assessed in Part 3 through examinations.

Please note: This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in module and programme handbooks.
