Summary of programme aims

The MA programme in Film Studies aims to enable students

- to build on their undergraduate studies, deepening their knowledge and theoretical understanding of some central issues in Film Studies;
- to enhance existing skills in close textual analysis of film and broaden their knowledge and understanding of the subject and its methods;
- to develop their abilities in critically evaluating primary and secondary source material;
- to develop their research skills and prepare them, where appropriate, for research degrees.

Transferable skills

The University's Strategy for Teaching and Learning has identified a number of generic transferable skills which all students are expected to have developed by the end of their degree programme. In following this programme, students will have had the opportunity to enhance their skills relating to research, communication of complex material (both written and oral), information handling, time management, problem-solving, self-directed learning and use of information technology. The MA in Film Studies will in addition help students develop skills such as: synthesising information from a range of sources, providing a coherent overview of competing theories and interpretations; analysing and critically evaluating competing theories and interpretations; planning and producing a substantial piece of research (or, in cases where students have prior experience of film-making, a critical practice project with documentation) under supervision; presentational skills; a range of research skills.

Programme content

The MA in Film Studies combines taught modules with independent research (or, for suitably qualified students, critical practice combining critical and creative work). In the first (Autumn) term, students follow two core taught modules, Textual Analysis and Alternative Forms in Film. In the second (Spring) term, students follow two Case Studies. All students follow a module in Research Methods over both terms. During the Summer Term students develop their dissertation, under supervision, and attend dissertation seminars.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Programme Directors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

Film, Theatre and Television Department MA students receive a Handbook, which gives details of the Programme, guidance on study skills such as note-taking and essay writing, and information about staff, facilities, and sources of specialised help within the University, such as the Study Skills Advisor and the Counselling Service. Academic feedback and guidance is given through detailed written comments, and academic and personal support is provided through the personal tutor system. The Department has a range of film/video viewing rooms and specialist studio and theatre spaces for practical drama, together with extensive technical facilities for small scale production in theatre and film/video, including digital video equipment. It also houses an extensive collection of films and television programmes. The Library, which has buildings on both the Whiteknights and Bulmershe campuses, has an extensive collection of printed materials as well as electronic databases. The Bulmershe Library holds one of the country's leading academic collections of film and modern theatre material. Specialist subject librarians are available to give students advice and guidance to library resources.

Career prospects

Over the years, students who have followed this programme have taken up a wide range of careers. Graduates have found that the specific as well as the transferable skills developed by the programme enable them to enter many fields of work including education, publishing, journalism, the media, management, administration, public relations and advertising, as well as many jobs with no subject-specific relationship. Some go on to further study at PhD level and obtain academic and academic-related jobs. A Reading MA in Film provides graduates with a range of communication, analytical, practical and social skills that will serve them in good stead in the world of work.
