

MSc/Diploma in Horticulture

Awarding Institution:	The University of Reading
Teaching Institution:	The University of Reading
Faculty of Life Sciences	Programme length: 12 months
For students entering in 2003	Date of specification: December 2003
Programme Director: Professor P Hadley	
Board of Studies: MSc Horticulture	

Summary of programme aims

The aim of the course is to provide advanced instruction in horticulture and, through a series of options, specialisation in temperate horticultural crop production, tropical horticultural crop production, amenity horticulture, social and therapeutic horticulture or horticultural crop protection.

The expected outcomes are that students should acquire and demonstrate:

- An understanding of the principles and theoretical background knowledge needed for an understanding of horticulture.
- A working knowledge of the practical techniques used in horticulture..
- An appreciation of the environmental and ethical issues associated with growing horticultural crops.
- An understanding of the aims and needs of horticultural enterprises to develop new products.
- A capacity to undertake research in horticulture.

Transferable skills

As part of this programme students are expected to gain or enhance their experience and competences in the following skills: IT (word-processing, use of spreadsheets and databases, use of Web resources), scientific writing, oral presentations, team working, problem solving, use of library resources and time management.

Programme content

<i>Mod Code</i>	<i>Module Title</i>	<i>Credits</i>	<i>Level</i>
<i>Compulsory modules (120 credits)</i>			
PSMHB1	Principles of Horticulture and Seminars	10	M
PSMHC5	Nursery Stock, Garden centres and Seminars	10	M
PSMHE2	Organic and Sustainable Horticulture	10	M
ASA01	Quantitative Methods for the Life Sciences	10	M
PSMHE4	Quality management and business communications	10	M
PSMHH3	Field course	10	M
PSMH3C	Research project	60	M
<i>Optional modules (60 credits, choose six modules from one of the course options)*</i>			
<i>Temperate and Tropical Horticultural Crop Production Options</i>			
PSMHC7	Floriculture	10	M
PSMAB7	Crops and Climate	10	M
PSMHA4	Marketing and Product Development	10	M
PSMAF8	Plant Tissue Culture	10	M
PSMAA7	Plant Biotechnology for Post Harvest Quality	10	M
PSMHB7	Horticultural Crop Physiology and Technology	10	M
PSMHH8	Plant Developmental Genetics and Physiology	10	M

PSMHA8	Controlled Environment Technology	10	M
APMA33	Seed Science and Technology	10	M
PSMAA4	Crop Physiology and Breeding	10	M
PSMHC1	Arboriculture and Practical Horticulture	10	M
SSSM20	Tropical Environments	10	M
APMA41	Crops and Water	10	M
APMA41	Agricultural production in the Tropics	10	M
PSMHU2	Computing for Horticulture and Landscape	10	M
PSMHA4	Marketing and Product Development	10	M

Amenity Horticulture and Social and Therapeutic Horticulture Options

PSMHL5	Planting Design	10	M
PSMHL7	Garden Design	10	M
PSMHN7	Landscape Ecology and Land Reclamation	10	M
PSMHC7	Floriculture	10	M
PSMHC2	Amenity Horticulture	10	M
PSMHC4	Amenity Grassland Management	10	M
PSMHK8	History of Landscape Design	10	M
PSMHC1	Arboriculture	10	M
PSMHM8	Community and Landscape	10	M
PSMHM7	Horticultural Therapy	10	M
PSMHU2	Computing for Horticulture and Landscape	10	M
PSMHA4	Marketing and Product Development	10	M

Horticultural Crop Protection Options

PSMHS7	Applied Entomology	10	M
PSMAB5	Crop Pests and Integrated Crop Protection	10	M
PSMAF8	Plant Tissue Culture	10	M
PSMHD4	Crop Disease and its control	10	M
PSMHB7	Horticultural Crop Physiology and Technology	10	M
PSMHV8	Practical Pest Management.	10	M
APMA62	Nematology	10	M
PSMAA2	Crop Physiology and Breeding	10	M
PSMHT8	Applied Plant Pathology	10	M
PSMHT7	Pests and Diseases of Horticultural Crops	10	M
PSMHU2	Computing for Horticulture and Landscape	10	M
PSMAB5	Crop Pests and Integrated Crop Protection	10	M
PSMHA4	Marketing and Product Development	10	M

* It may be possible for students to choose some modules from another option

A Diploma may be obtained by completing the six compulsory modules, three additional optional modules and an extended essay worth 30 credits by the end of June (PSMH5C)

Part-time/Modular arrangements

The modules may be taken on a part-time basis over two or more years with students normally dividing the modules equally between years. The research project must be submitted by **20th September** in the final year.

Progression requirements

See appended progression requirements for students following a post-experience certificate.

Summary of teaching and assessment

The teaching is organised in modules (totalling 180 credits) that involve a combination of lectures, tutorials, workshops, seminars, and practical sessions. Twelve modules taken largely in the autumn

and spring terms (120 credits) will be assessed by a mixture of coursework and formal examinations. The assessment of the remaining 60 credits will be of the practical project or dissertation report.

The University's taught postgraduate marks classification is as follows:

<u>Mark</u>	<u>Interpretation</u>
70 – 100%	Distinction
60 – 69%	Merit
50 – 59%	Good standard (Pass)
<u>Failing categories:</u>	
40 – 49%	Work below threshold standard
0 – 39%	Unsatisfactory Work

For Masters Degrees

To pass the MSc students must gain an average mark of 50 or more overall including a mark of 50 or more for the dissertation. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must be less than 60 credits.*

Students who gain an average mark of 70 or more overall including a mark of 70 or more for the dissertation and have no mark below 40 will be eligible for a Distinction. Those gaining an average mark of 60 or more overall including a mark of 60 or more for the dissertation and have no mark below 40 will be awarded eligible for a Merit.

For PG Diplomas

To pass the Postgraduate Diploma students must gain an average mark of 50 or more. In addition the total credit value of all modules marked below 40 must not exceed 30 credits and for all modules marked below 50 must be less than 60 credits.*

Students who gain an average mark of 70 or more and have no mark below 40 will be eligible for the award of a Distinction. Those gaining an average mark of 60 or more and have no mark below 40 will be awarded eligible for a Merit.

*The provision to permit a candidate to be passed overall with a profile containing marks below 40 is made subject to the condition that there is evidence that the candidate applied his or herself to the work of those modules with reasonable diligence and has not been absent from the examination without reasonable cause.

Admission requirements

Entrants to this programme are normally required to have obtained a honours degree in a biological subject, agriculture, horticulture, or environmental science, and persons with other qualifications as may be approved by senate. Applicants whose academic qualifications do not meet these requirements may in the first instant be admitted to a post-experience course; they may then transfer to MSc status if their performance during the first term is satisfactory.

Admissions Tutor: Professor P Hadley

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is

provided by Programme Directors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

Career prospects

Graduates from the course are likely to find opportunities with industrial enterprises and institutions in the areas of commercial horticultural crop production, amenity horticulture, and horticultural therapy. Other opportunities exist at universities seeking graduates with pre-training for research to PhD level, and governmental, media and other organisations involved with horticulture.

Opportunities for study abroad or for placements

Students will be able to undertake the 60 credit project module at an approved institution or an appropriate industrial concern, but this will depend on having the necessary linguistic skills and finding a suitable placement, and appropriate supervisory arrangements being in place.

Educational aims of the programme

- An understanding of the principles and theoretical background knowledge needed for an understanding of horticulture.
- A working knowledge of the practical techniques used in horticulture..
- An appreciation of the environmental and ethical issues associated with growing horticultural crops.
- An understanding of the aims and needs of horticultural enterprises to develop new products.
- A capacity to undertake research in horticulture.

Programme Outcomes

Knowledge and Understanding

A. Knowledge and understanding of: 1. the concepts and techniques of horticulture and their application to commercial and amenity horticulture. 2.the scientific knowledge underpinning the development of current horticultural knowledge. 3. current advances in commercial, amenity and social aspects of horticulture	Teaching/learning methods and strategies The knowledge required is provided in formal lectures supported by practical work, seminars and presentations. Feed back on student work is provided by the discussion and return of work in tutorials and seminars. All practical work is marked and returned to the student. <i>Assessment</i> Most knowledge is tested through a combination of coursework, including oral presentations, and formal examinations, plus a written report of a practical based project.
---	---

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none"> 1. think logically and evaluate critically research and advance scholarship in the discipline 2. plan and implement tasks at a professional level to solve problems related to the discipline 3. evaluate methodologies and where appropriate propose new hypotheses 4. plan, conduct and write a report on an independent practical project. 	<p>Teaching/learning methods and strategies</p> <p>Logical application of science and the critical appraisal of methodology are essential parts of the role of a horticulturist in the horticulture industry. These skills will underpin the lectures, practical and project work.</p> <p><i>Assessment</i></p> <p>1-3 are assessed directly and indirectly in most parts of the course 1-4 are assessed in the final research project report.</p>
<p>C. Practical skills – able to:</p> <ol style="list-style-type: none"> 1 apply, or adapt, practical instructions safely and accurately 2 carry out a variety of experimental procedures in the laboratory. 3 interpret quantitatively the results of experiments undertaken by themselves or others 4 devise experimental methods appropriate for tackling a particular problem 	<p>Teaching/learning methods and strategies</p> <p>A range of detailed or outline practical instructions are used to allow students to develop a range of practical skills.</p> <p>Staff and postgraduate demonstrators are present during practical sessions to guide and help, to mark their reports and give feedback on their work.</p> <p>Students will work on their project under the guidance of one or more members of staff.</p> <p><i>Assessment</i></p> <p>1-4 are assessed to different extents by the practical work associated with the various modules undertaken.</p>
<p>D. Transferable skills – able to:</p> <ol style="list-style-type: none"> 1 make use of IT (word processing, spreadsheets, web sources) 2 communicate scientific ideas 3 give oral presentations 4 work as part of a team 5 use library resources 6 manage time 	<p>Teaching/learning methods and strategies</p> <p>The use of IT is made throughout the programme.</p> <p>Team work is essential in the practical and seminar sessions associated with modules</p> <p>Library resources are addressed in all the modules and during the project and work.</p> <p>Time management is essential for the timely and effective completion of the programme.</p> <p><i>Assessment</i></p> <p>1-5 contribute to assessed coursework during the first two terms.</p>
<p><i>Please note:</i> This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably expect to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in module and programme handbooks.</p>	

Appendix

Progression from Post-experience certificate to MSc course

Candidates admitted to a post-experience course who have followed the MSc programme during the Autumn term may, at the discretion of the Head of School, transfer to the MSc programme if their performance in the December/January School examination is satisfactory. The registration being back dated to the beginning of the Academic year.
