E-Mentor Helping Hand – impact of support aids offered to students regarding education, jobs and personal issues

Chelsea Davis

BSc Information Technology

ABSTRACT

E-Mentor Helping Hand explores the difficulties faced by many young people of today, combining personal issues and educational issues that are currently problems in the UK. Addressing how these issues can be resolved in the form of an IT service to improve the lives of young people and to give them a tool to help achieve in their education and life. Existing services that are available are compared to then explore how to provide young people with one place to turn to, aiding a variety of different stories and lives. Discussed is how E-Mentor Helping Hand is a service that reaches all needs and successfully aids young people. Emphasizing how it is more beneficial and how it will make a change to many. The research can be used to understand the issues and to aid the production of similar e-mentor systems. The mission is purely to change lives.
