

Student Alumni Project

Luke Rickerby

BSc in Information Technology

ABSTRACT

The following paper summaries the content within the report entitled Student Alumni Project, it gives a small insight into small sections of the report including the problem statements and the success criteria a summary of the potential solutions that were originally thought of, what was used to implement/create the site and the types of testing that were done to ensure that the site stays operational and meets the success criteria outlined in the report previously. The paper ends on a potential continuation of the current project and how it can be improved upon and how to maintain it for future compatibility.
