

## Personal Healthcare Portal – Personal Healthcare Report

Anthony Stec

BSc Information Technology with Industrial Year

### ABSTRACT

This paper will discuss the ‘Personal Healthcare Report’ within the ‘Personal Healthcare Portal’ of the final year project. The ‘Personal Healthcare Report’ will gather user data and input it within a report, which will be sent to a Healthcare Professional for analysis. Please see *Figure 1* for a high-level overview of the system structure. In terms of this document structure, the project will be introduced in the ‘introduction’ section, followed by ‘functionality overview’, where functionalities will be discussed. Limitations of functionalities will also be discussed, along with how testing has been complete to improve the application.
