MUSICAL INSTRUMENT FOR STROKE PATIENTS
Vincent Balungay

BSc Software Engineering

ABSTRACT
Playing music has always been an enjoyable task to do. The main focus of this paper is to explain how to integrate music while performing physiotherapy exercises. Through the use of technology and programming, it is possible to combine movements used to play instruments and the movements used to perform a certain exercise. The aim is to create an instrument which patients can use to play and learn music but at the same time perform Physiotherapy Exercise.
