Family Photo Albums Online
Edward Walsh
BSc Information Technology, E.Walsh@student.reading.ac.uk

ABSTRACT
Family Photo Albums is the title of the product of my dissertation. It is a website devoted to
members of a family being able to upload and share photos amongst other members of their
family (as well as external members should they wish to). This conference paper details the
Family Photo Album website as well as specifies a unique feature about the site. The research
carried out revolves around the rapidly growing presence/usage of current social networking
sites and the potential gap in the market for a more family oriented site rather than a friend
oriented site. The features of the site shall also be mentioned and described in further detail.
This paper sets out to give an overview of the product as well as a stand out feature.
