

ENGINEERING AND MANUFACTURING

Although the Engineering sector – whether aeronautical, automotive, bioengineering, chemical, electronic and electrical, and mechanical – needs those with engineering degrees, you might be surprised to know that they also have roles for graduates of all disciplines.

Engineering firms recruit to a wide range of roles (e.g. marketing, HR, IT, sales, planning, project management) which means that if you like the sound of working for an organisation which designs, innovates and creates some of the products you admire – there might be an opportunity for you there.

Engineering organisations active in our region include automotive firms (e.g. [McLaren](#) in Woking), aerospace and defence (e.g. [Thales](#) and [AWE](#)), mechanical engineering (e.g. [Dyson](#) in Wiltshire), civil engineering (e.g. [HR Wallingford](#)).
