Active Bystander Training

10:00 – 11:30, Online

Racism, bullying, sexual harassment and other inappropriate behaviours contribute to a toxic culture. The impact they have on people can be hugely detrimental – leading to stress, anxiety, and mental health problems. As we are seeing in the news, it can be deeply corrosive and damaging if these behaviours and attitudes are normalised over time. That's why it's essential for everyone to know how to speak up when problems arise.

This innovative and award-winning training gives you – and your people – the skills to challenge unacceptable behaviours, including those which may have become normalised over time.

This course consists of a group online session followed by an ongoing discussion and sharing of further resources.

Register to attend on UoRLearn
or please contact People Development for more information at peopledevelopment@reading.ac.uk.
