

# Partnering for the planet

## Primary Art – KS2 activity

### Create a zig zag book

Draw or paint an environment on one side of your zig zag and the animals who live there on the other, so that you can see both.

You could base this on the UK's climate stripes (below) for the past six years and link this to the effects that climate change will have on our ecosystems, using the zig zag for a view of 'before' and 'after'.
