

Postgraduate Certificate in Academic Practice For students entering in 2006-07

Awarding Institution: The University of Reading
Teaching Institution: The University of Reading
Faculty of Economic and Social Sciences
Date of specification: Programme length: 24-48 months
Programme Director: Professor David Malvern
Board of Studies: Institute of Education
Accreditation: Higher Education Academy (HEA)

Summary of programme aims

- To provide participants with the understanding, knowledge and skills necessary to facilitate learning and teaching of their subject at undergraduate and postgraduate level.
- To provide participants with a framework suitable for their continuing professional development and effective performance within the UK Higher Education system.

Transferable skills

The Programme is for new lecturers or other staff relatively new to teaching in Higher Education. It will meet the threshold professional standards to be specified by the Higher Education Academy. Accreditation by the HEA assumes that the programme will provide participants with transferable skills for the essential elements of teaching and learning support activities at HE level in the UK.

Programme content

The Programme consists of two compulsory modules.

		<i>Credits</i>	<i>Level</i>
EDM068	<i>Developing Academic Practice</i>	30	M
EDM066	<i>Teaching and Learning in Practice</i>	30	M

Part-time/Modular arrangements

All participants on this Programme will be employed by the University and therefore the Programme is only available on a part-time basis. It will be completed between a minimum of two years and a maximum of four years. Options are available to take a large proportion of the workshop elements in Module EDM068 during the vacation period or on Wednesday afternoons. The workshop programme can be completed over a number of years to enable greater flexibility. The Programme starts each September, October, January and April.

Progression requirements

None

Summary of teaching and assessment

Module EDM068 consists of twenty interactive workshops of between two and four hours. These cover key aspects of teaching, assessment, supporting students, quality assurance and policy and establishing a research profile. The assessment for Module EDM068 is through a work-based

project on an aspect of teaching and learning. The project must be agreed with the participant's home School and the Programme team. The report should be between 4000-8000 words in length.

Module EDM066 provides practical experience of teaching, learning and assessment in Higher Education. Issues involved in discipline specific teaching are considered through normal teaching activities and supported by a mentor and other colleagues. Individual choice of other continuing professional development activities, totalling 15 hours contact time, enable learning to be focused on areas of particular interest or need. Six peer observations of teaching activities form an integral part of the module. The module is assessed through a work-based teaching portfolio, which must cover certain aspects of teaching and supporting learning in HE. The portfolio narrative should be between 6000-10000 words in length

Mark Interpretation

70 – 100% Distinction

60 – 69% Merit

50 – 59% Good standard (Pass)

Failing categories:

40 – 49% Work below threshold standard

0 – 39% Unsatisfactory Work

To pass the Postgraduate Certificate students must gain 50% or more in both modules.

Admission requirements

Entrants to this programme are normally required to hold a post at the University which has teaching included as a part of the role.

Admissions Tutor: Sarah Liddell will advise staff on the appropriateness of the programme in their individual circumstances.

Support for students and their learning

University support for students and their learning falls into two categories. Learning support includes IT Services, which has several hundred computers and the University Library, which across its three sites holds over a million volumes, subscribes to around 4,000 current periodicals, has a range of electronic sources of information and houses the Student Access to Independent Learning (S@IL) computer-based teaching and learning facilities. There are language laboratory facilities both for those students studying on a language degree and for those taking modules offered by the Institution-wide Language Programme. Student guidance and welfare support is provided by Programme Directors, the Careers Advisory Service, the University's Special Needs Advisor, Study Advisors, Hall Wardens and the Students' Union.

Participants also have access to a resource library of materials related to teaching and learning held in the Centre for Staff Training and Development. The Learning and Teaching Support Network provides valuable subject specific information and resources. The Programme is supported by a Blackboard website giving additional materials and links to University policy and procedures. One to one or small group tutorials are available to support any aspect of the programme. Tutorial sessions on portfolio and project writing are offered regularly and can be arranged at any time on request.

Career prospects

The Programme is for staff already in employment at the University. For those not holding a permanent academic post and who aspire to do so, completion of such a Programme will be a requirement at every UK university from 2006. This qualification and the credits accumulated through the completion of each module are transferable.

Educational aims of the programme

The Programme is intended for new lecturers and similar staff who are relatively new to teaching in Higher Education. It is accredited by the Higher Education Academy and intends to provide demonstration of the threshold professional standards being developed for the sector by the HEA. The Programme recognises that much of the learning happens in the academic Department or School through actual teaching experience. It aims to build on these natural processes and in doing so to provide participants with:

- the understanding, knowledge and skills necessary to facilitate learning and teaching of their subject at undergraduate and postgraduate level.
- a framework suitable for their continuing professional development and effective performance within the UK Higher Education system.

Programme Outcomes

Knowledge and Understanding

Skills and other attributes

<p>B. Intellectual skills – able to:</p> <ol style="list-style-type: none">1. Describe the personal philosophy which underpins the approach taken to teaching in HE2. Justify decisions relating to course design, assessment and teaching or learning methods from a pedagogical standpoint.3. Evaluate good practice and make decisions on its relevance and application to discipline specific situations.4. Analyse factors contributing to successful or problematic learning situations.	<p>Teaching/learning methods and strategies</p> <p>Interactive workshops including discussions, group work, sharing good practice, problem solving and case studies.</p> <p>Work in Schools with mentors and other colleagues on discipline specific issues.</p> <p>Individually tailored tutorials</p> <p><i>Assessment</i></p> <p>Reflective portfolio to describe teaching development supported by evidence from academic practice.</p> <p>Work based project on an aspect of teaching or supporting learning.</p>
<p>C. Professional and Practical skills – able to:</p> <ol style="list-style-type: none">1. Translate theories of teaching and learning into practice.2. Provide an effective learning environment for undergraduate and postgraduate students.3. Reflect on your own practice.4. Plan your continuing professional development.5. Establish a research profile.6. Work to University expectations, guidelines and policies.	<p>Teaching/learning methods and strategies</p> <p>Interactive workshops including discussions, group work, sharing good practice, problem solving and case studies.</p> <p>Work in Schools with mentors and other colleagues on discipline specific issues.</p> <p>Peer observation/review of teaching</p> <p><i>Assessment</i></p> <p>Reflective portfolio to describe teaching development supported by evidence from academic practice.</p> <p>Work based project on an aspect of teaching or supporting learning.</p>

D. Transferable skills – able to:

1. Participate effectively in the peer review process.
2. Discuss and explain teaching your subject to others from different disciplines.
3. Compose a portfolio of teaching practice.
4. Identify good practices in mentoring.
5. Disseminate good practice to colleagues.
6. Network with both academic and administrative colleagues from across the University.

Teaching/learning methods and strategies

Interactive workshops including discussions, group work, sharing good practice, problem solving and case studies.

Work in Schools with mentors and other colleagues on discipline specific issues.

Peer observation/review of teaching

Assessment

Reflective portfolio to describe teaching development supported by evidence from academic practice.

Please note - This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the module description and in the programme handbook. The University reserves the right to modify this specification in unforeseen circumstances, or where the process of academic development and feedback from students, quality assurance processes or external sources, such as professional bodies, requires a change to be made. In such circumstances, a revised specification will be issued.
