Psychology and Clinical Language Sciences at Reading

Postgraduate opportunities at an institution rated in the top 1% of universities worldwide

The University of Reading is ranked in the top 1% of universities in the world (Times Higher Education, World University Rankings). The University was awarded its charter in 1926 – a red brick university with one of the most beautiful campuses in the UK, situated just half an hour from London Heathrow Airport.

With over 80 years of experience, the School of Psychology & Clinical Language Sciences is a world leader in teaching, research and training. The international research standing of the School is based on a world class contribution to psychology, language sciences and neuroscience. The School comprises of the Department of Psychology, the Department of Clinical Language Sciences, the Centre for Neuroscience and Neurodynamics, and the Charlie Waller Institute for Evidence-based treatments. We also play a leading role in the newly established Centre for Literacy and Multilingualism.

We are housed in a purpose-built facility which includes a Siemens 3T whole-body MRI scanner, EEG and TMS laboratories, social observation suites, computing facilities and, uniquely within the UK, dedicated speech, memory, anxiety & depression NHS research clinics.
Postgraduate taught

We offer a portfolio of seven MSc courses offering outstanding teaching provided by internationally renowned researchers. Our career focussed courses can be completed full-time or part-time and include plenty of hands-on research experience. A range of modules will allow you to tailor your MSc experience to suit your own interests and requirements.

- MSc Research Methods in Psychology
- MSc Speech and Language Therapy (2 year)
- MSc Cognitive Neuroscience
- MSc Development and Psychopathology
- MSc Clinical Aspects of Psychology
- MSc Language Science
- MSc Behavioural Finance

Postgraduate research

Students are supervised by two members of academic staff within the School. We have research groups working in the areas of Language & Cognition, Nutrition & Health, Perception & Action, and Psychopathology & Affective Neuroscience, all underpinned by our expertise in child development, psychology over the lifespan and the neuroscience of health and disease. Successful completion of this program leads to the award of an MPhil or PhD.
